SUMMARY

MCA graduate with hands-on experience in AWS cloud infrastructure, data science, and full-stack (MERN). Skilled at building scalable, practical applications and solving real-world problems with clean, efficient code. Strong foundation in Python, SQL, and data analytics, with a proven ability to design and deploy secure, cloud-based systems. Seeking to grow as a Cloud Engineer or Data Analyst

PROJECTS

Job Portal (MERN Stack Web Application)

Node.js · Express · React · MongoDB Atlas

- Built a full-stack job portal enabling employers to post openings and candidates to search, filter, and track applications in real time
- Implemented REST APIs and webhook-based notifications for instant application status updates

Smart Home Automation (IoT System)

Arduino · ESP8266 · Blynk API · C++

- Developed an IoT-based home automation system using an ESP8266 microcontroller and the Blynk API
- Enabled remote monitoring and control of household appliances via a mobile app with live sensor data feeds

Secure Cloud Storage System (AWS)

AWS S3 · EC2 · IAM · Python

- Designed a secure file storage and sharing platform using AWS S3 with encryption for data protection
- Configured IAM roles for access control and EC2 with load balancing to ensure high availability at scale
